# Drinfeld Moduli Schemes And Automorphic Forms The Theory Of Elliptic Modules With Applications

**drinfeld moduli schemes and automorphic forms: the theory ...** - drinfeld moduli schemes and automorphic forms: the theory of elliptic modules with applications yuval z. flicker abstract. we develop drinfeld's theory of elliptic modules and their moduli schemes to establish the correspondence of irreducible continuous  $\ell$ -adic rank  $r$  representations of the weil (subgroup of the galois) group of a function field **drinfeld moduli schemes and infinite grassmannians - arxiv** - drinfeld moduli schemes and infinite grassmannians a. alvarez \* contents 1. introduction 1 2. preliminaries on the sato's infinite grassmannian. 3 3. the krichever morphism as a closed immersion in the sato's infinite grassmannian. 4 4. immersion of drinfeld moduli schemes in a finite product of infinite grassmannians. 8 references ... **drinfeld moduli schemes and infinite grassmannians** - drinfeld moduli schemes 823 the usual notion of sato's infinite grassmannian. moreover, it generalizes the finite grassmannian. in the third section, we consider the krichever morphism over an arbitrary scheme and conclude that the moduli functor of vector bundles (over a curve) with certain level structures is representable **drinfeld moduli schemes and automorphic forms the theory ...** - drinfeld moduli schemes and automorphic forms the theory of elliptic modules with applications author: ukarabia subject: download drinfeld moduli schemes and automorphic forms the theory of elliptic modules with applications keywords: read drinfeld moduli schemes and automorphic forms the theory of elliptic modules with applications **title on compactification of drinfeld moduli schemes(moduli spaces ...** - this is a short synopsis myof talk entitled on compactification of drinfeld moduli schemes richard pink max-planck-institut für mathematik, bonn, germany heldat the 'mini-conference on moduli **drinfeld modules - universität regensburg** - the moduli space of drinfeld modules plays a crucial role for the langlands cor-respondence for  $gl_r$  over function fields over finite fields. in fact in analogy to eichler-shimura theory for elliptic curves one decomposes the  $\ell$ -adic étale cohomology of the moduli space by the action of hecke operators and a galois action which **an alternative description of the drinfeld  $p$**  - an alternative description of the drinfeld  $p$ -adic half-plane stephen kudla and michael rapoport abstract. we show that the deligne formal model of the drinfeld  $p$ -adic halfplane relative to a local field  $f$  represents a moduli problem of polarized  $\mathcal{O}_f$ -modules with an action of the ring of integers in a quadratic extension  $e$  of  $f$ . **tate uniformization of drinfeld modules and ...** - tate uniformization of drinfeld modules and compactifications of drinfeld modular varieties 1. review let us use the usual notation  $c$  is a geometrically connected smooth projective curve over a finite field  $f$ .  $12c$  is a closed point.  $f = f|_q(c)$  is the function field of  $c$ .  $a = H^0(c, \mathcal{O}(1))$  is the ring of functions on  $c$  that are regular outside  $1$ .  $ab = \lim_{\leftarrow} \mathbf{introduction - stanford university}$  - schemes, thereby removing the étaleness restriction on the level when working away from the cusps. when there is "enough" level (to remove non-trivial isotropy groups), the work in [km] constructs affine moduli schemes over  $z$  for drinfeld level structures on elliptic curves. these schemes were proved to be normal and **expos6 vbis serre-tate local moduli - math** - expos6 vbis serre-tate local moduli par n. katz introduction. it is now some sixteen years since serre-tate [13] discovered that over a ring in which a prime number  $p$  is nilpotent, the **on the drinfeld moduli problem of  $p$ -divisible groups** - cambridge journal of mathematics volume5,number2,229-279,2017 on the drinfeld moduli problem of  $p$ -divisible groups michael rapoport\* and thomas zink† drinfeld proved that the  $p$ -adic upper half space  $\Omega_d$  for a  $p$ -adic local field  $f$  is the general fiber of a formal scheme which is the moduli space of special formal  $\mathcal{O}_d$ -modules, where  $d$  is a central idempotent ... **uniformization of drinfeld modular curves** - the drinfeld modular curve (of rank  $r$  and level  $i$ ) is the rigid analytic cation  $mr_i := (m, r, i, ak, 1)$  rig of the moduli scheme. the  $c$ -points of the rigid space  $mr_i$  classify isomorphism classes of drinfeld modules over  $c$  of rank  $r$  with level-structure. in [dri74, x3], we saw an alternate classification of such objects in terms of **arithmetic of elliptic curves over function fields - uni-due** - relation to class field theory as a motivation for the much more difficult drinfeld reciprocity law for  $r=2$  discussed in later talks. references: sections 2.3-2.4 and 2.6 of [gr96] contain a brief account, to be used as a guideline. for more details on drinfeld moduli schemes see [dri74, sections 2, 3, 5 and 9] and [dh87, chapters i and ii]. **drinfeld modules and torsion in the chow groups of certain ...** - our situation we must replace moduli schemes for elliptic curves with drinfeld modular curves. thus section 4 recalls briefly the notions of drinfeld module, full level structure, and  $\Gamma_0$ -level structure. essential facts about the modular varieties for full level structure and their compactifications are recalled in section 5. **contents introduction - universität bielefeld** - algebras in the formulation of the moduli problem. in section 4 we establish an isomorphism between our moduli functor when restricted to  $k$ -schemes with the original drinfeld moduli functor. the main tool here is the theory of displays. in section 5 we determine the local structure of our moduli scheme. in section 6 we prove the compatibility ...
